Passagier uit bus gehaald wegens "super geheime al Qaeda schoenen"

www.rtvnh.nl

Hysterie alom toen een parkinson patient de bus betrad en oplettende mede passagiers zijn dodelijke deathray schoenen from hell ontwaarden.... gelukkig was de politie snel ter plaatse.

Trefwoorden bij dit artikel:
deathray, killer, shoes, paniek

When Did Ray Kennedy's Parkinson's Disease Begin?

A. J. Lees

Department of Neurology, The Middlesex Hospital, Mortimer Street, London, U.K.

Summary: Ray Kennedy's Parkinson's disease probably began during his distinguished career as a professional soccer player at least 10 years before the first unequivocal physical signs and 14 years before the diagnosis was finally made, when he was 35-years old. Early prodromal symptoms included inter-

Depression and no other symptoms
